Concorde Career College – Kansas City WREB Patient and Candidate COVID19 Procedures

Patient Arrival and Screening

Patient and candidate to present to clinic with a face covering.

DH Staff will have patient and candidate sanitize their hands, take a temperature reading and ask the ADA pre-screening questions of the patient.

Any positive responses from the prescreening or day off screening will be referred to the staff DDS.

Patient will be walked to the clinic for seating by the candidate or seated in the waiting room.

Provider will don PPE directly prior to patient seating. All PPE provided by Concorde Career College (candidate may also bring their own) to include disposable gown, shield (accommodates loupes but not light), level 3 mask and gloves.

Turn on extraoral suction (level 2) upon seating the patient to direct aerosols away from the provider.

Pre-Treatment

Candidate will ask the patient to remove their face covering administer the pre-procedural rinse for one minute and evacuate with saliva ejector.

Extra and intra-oral images can be taken as needed.

Treatment

Candidates may leave their op to get supplies but must wash or disinfect their hands after removing and before replacing gloves.

During treatment, place the extraoral vacuum close the patients head. Use level 2 or higher when hand instrumenting and level N95 when ultrasonic scaling.

Releasing Patients

Patient will be asked to sanitize their hands and don their mask prior to exiting.
