2020 IMPORTANT EXAM INFORMATION

Identification at Exam
Candidates MUST present acceptable and valid identification (ID), as described below, to be admitted to the WREB Dental Exam. Please have your identification available on Orientation Day.

NOTE: Questions about the following identification requirements, should be directed to the WREB Dental Department BEFORE applying for the exam.

You must provide a professional, head and shoulders, passport quality photo during the exam registration process. This becomes a component of your individual Candidate Profile at WREB and will be included on all score reports to schools and state licensing boards. The profile photo is used to create individual Candidate ID badges for the exam. This profile photo and the identification verification document will be validated at the exam by the WREB Site or Auxiliary Coordinator to verify the identity of the Candidate. Identification must be verified prior to admittance to any WREB clinical examination.

At the exam, Candidates will need to provide two (2) valid, non-expired forms of identification, one of which must be primary and one may be secondary.

At any time during the exam, Candidates may be asked and should be prepared to present their identification and Candidate ID badge to a School Coordinator, Site Coordinator, Auxiliary Coordinator, or Floor Examiner. Admittance to the exam does not imply that the identification you presented was valid. If it is determined that your ID was fraudulent or otherwise invalid, WREB will report to the appropriate governing agencies or board any candidate or other individual who has misreported information or altered documentation in order to fraudulently attempt an exam. Candidates are subject to dismissal from the WREB Clinical Exam.

Primary ID must have Candidate’s name, photo and signature. Acceptable forms of primary ID are:
- State/Government-issued driver’s license
- Passport
- Military ID
- Alien registration card
- Government-issued ID
- Employee ID
- School ID (must have either an expiration date and be current or have a current date of school year)

Secondary ID must have Candidate’s name and signature. Acceptable forms of secondary ID are:
- Social Security card
- Bank credit card
- Bank ATM card
- Library card

Make sure your ID’s are current and indicate the same name that you registered with online at wreb.org. This is very important for admittance into the examination.

Patient Selection
Patient selection is an important factor in the clinical exam. Candidates must provide a patient/s for the Operative and Periodontal Treatment procedures. The following criteria apply to all patients for the Clinical Exam:
- The minimum patient age for the Periodontal Treatment procedure is 18 years.
- There is no minimum age for Operative procedures. Parents or Guardians must complete the consent agreement, located on the back of the Patient Medical History Form.
- Patients cannot have completed more than two years of dental school.
- Patient selection is your responsibility. WREB staff, the Boards of Dentistry of participating states, and dental schools are not able to supply patients. You are graded on your ability to accurately determine and effectively interpret patient qualification criteria. This is an integral part of the examination. Therefore, other professionals should not “prequalify” your patient for the examination.

Malpractice Insurance
AAIC Insurance Company, through the Professional Protector Plan in cooperation with WREB, will extend professional liability coverage with the limit amounts of $1,000,000/$3,000,000 for the patient-based portion of the 2020 dental exam at no charge to the Candidate.

Equipment
Candidates must furnish all instruments and equipment, including high and low-speed hand pieces. Equipment may be available to rent at some exam sites. Details are covered in the Exam Site Information.
