Directions to Tufts Dental

By Bus, Amtrak and MBTA Commuter Rail: the bus or train terminal at South Station is a 10-minute walk (about eight blocks) from the Dental Health Sciences Campus. Walk south on Atlantic Avenue to Kneeland Street, then west on Kneeland Street to the corner of Washington and Kneeland Street. From North Station: take the orange line to the Tufts - Medical Center stop, exit onto Washington Street, turn left down to the corner of Washington and Kneeland, we are located at One Kneeland Street.

By Subway, take MBTA Orange Line to "Tufts-Medical Center," exit subway station, cross Washington Street, walk left toward Kneeland Street.

Driving

From the south: Take Route 93 NORTH to Exit 20 (South Station, Chinatown) veer to the left and follow the ramp to the stop light. At the bottom of the ramp (Kneeland Street), turn LEFT. Follow Kneeland Street to Tremont Street, turn left to parking garage (on left).

From the north: take Route 93 south to Exit 20 (Surface Artery Road, South Station, Chinatown) follow until you come to Kneeland Street, turn right, follow straight to Tremont Street, turn left into parking garage.

Parking

Metered parking on Washington and Kneeland Street.

Parking garages:

Tufts Medical Center, 274 Washington Street, 617-423-4027

Tremont Street Auto Parks, 284 Tremont Street, one block west of the dental building, 617-423-4027.

Fitz-Inn, 441 Stuart Street, 617-482-7740.

Inter-park, 40 Beach Street, Boston, 617-426-7717.

Airports

Logan International Airport, Boston, MA (BOS) Easily accessible to Tufts Dental School, Boston Mass.

T. F. Green Airport, Providence RI 71 miles south of Boston, 59 miles. Take I 95 North to Boston to I -93/128, exit 20- follow signs to South Station/China Town, at end of the ramp, and take left onto Kneeland Street. Map of Tufts Medical Center.

School Fee
Non-Tufts Dental Candidates must pay a clinic usage fee of $750.00 for the exam. It must be a money order or cashier’s check (all checks payable to Trustees of Tufts College). Payment must be received by Monday March 2, 2020. Payment will not be accepted on Friday March 6, 2020 during Orientation.

IMPORTANT NOTICE:
If bringing your own instruments and materials the user fee of $750.00. The user fee applies for one or all section of the exam. You are welcome to use Tufts equipment and material once the school user fee is received. All cassettes and materials may be procured from the dispensary and it must be returned immediately at the conclusion of the examination. We do not rent or arrange for the rental of equipment for the exam.

Please send your payments to:
Tufts University School of Dental Medicine
One Kneeland Street. DHS 305
Office of the Associate Dean of Clinical Affairs
Boston, MA 02111
Attention: Paula Callahan

Refreshments - will be provided to all Dental Candidates twice per day. Breakfast, delivered no later than 6:30 am. Lunch will be provided to candidates and to their assistants at 11:30 am in the Student Lounge, room # 452 (4th floor Student Lounge).

Patient Screening and Radiographs - only students of Tufts University School of Dental Medicine are allowed to screen their patients, or prospective patients for this examination. Non -Tufts Candidates are not allowed to screen patients.

Provisional Acceptance- Tufts University will not be participating in Provisional Acceptance for outside candidates.

Radiographs – Tufts University is a digital facility, which has monitor-to-monitor viewing. Outside candidates are asked to bring print outs of their radiographs. We will not be equipped for secure transmission of images between different exam sites or from another school to the exam site. Non-Tufts Candidates please refer to your Candidate Guide on the WREB requirements for Radiographs.
Preparing for the Exam

Cubicles (Operatories) – Assignments

For all candidates, numbered operatory assignments are made by the WREB organization. The assignments will correspond to the applicant’s numbered I.D. badge, which will be issued at orientation. Each operatory is equipped with one dental chair (ADEC), with air/water (ADEC) and an operator’s stool. Dental maintenance personnel will be on hand during the entire examination in case of malfunctions.

Equipment, Instruments and Materials

Handpiece hookups - located on the utility tray in front of each tray by each operatory chair. Midwestern hand pieces are the only handpieces utilized at our school. A limited number of connectors are available at the dispensaries, and these connectors can only be used on the Mid West Handpiece.

Our handpiece cassette includes the high speed and low speed with four attachments. Candidates after paying the School User fee will be given a three-part ticket for all portions of the Exam. The ticket will include the candidates name, school, date and signature. This ticket will only be provided when the School User Fee has been paid. The candidate then will give the ticket to the dispensary assistant and the dispensary assistant will sign the form. The dispensary assistant will give the candidate all necessary instruments and handpieces for the exam. At the end of the exam, the candidate will return all equipment to the dispensary, and the dispensary assistant will sign the completed form.

We will provide a cavitron and tip to all WREB candidates.

Materials – Expendable

Consumable products necessary for the exam are:
- Instrument Tray - Disposable (Barriers, Gloves, Masks, Patient Napkins, Headrest Cover, Facial Tissue,

Protocols and Procedures for Infection Control

To achieve a high standard of infection control, it is essential to develop an awareness of the current level of cleanliness or contamination of your gloved hands and of any object, you may touch, and to carry that awareness with you at all times. In particular, any object may be classified as contaminated (for example, with blood or saliva), sterile, or simply “clean” (neither contaminated nor sterile). A “clean” object may carry the types and low amounts of microorganism normally present in a non-clinical environment. If an object in a higher category of cleanliness or sterility meets an object in a lower category, its status will be converted to that of the lower category. For example, if a person wearing a contaminated glove reaches into the mask box to remove one, then that mask and all the other masks in the container are now contaminated. The infection control guidelines are intended to foster an awareness of these concepts and methods when performing required patient care procedures. For your safety and the safety of others, the general principles of cleanliness in the workplace, the use of protective attire, the separation of uncontaminated and contaminated items and work areas, and a constant consideration of the potential for cross-contamination should be observed.

Standard Precautions, as defined by the Centers for Disease Control and Prevention (CDC), must be used in all patient care in dentistry. This term refers to a set of precautions designed to prevent transmission of human immunodeficiency virus (HIV), hepatitis B virus (HBV), hepatitis C virus (HCV) and other blood borne pathogens in health care settings. Under Standard Precautions, blood and saliva (in dentistry) of all patients are considered potentially infectious for HIV, HBV, HCV and other blood borne pathogens. Applied Standard Precautions means that the same infection control procedures for any given dental procedure must be used for all patients. Thus, the required infection control policies and procedures to be used for any given dental procedure are determined by the characteristics of the procedure. Therefore, Standard Precautions are procedure specific, not patient specific. (CDC)
